Abhishek Kumar Maurya

Staff Software Engineer — AI agent platforms, MCP and evals

Hyderabad, India +917842740174 akm.nitt@gmail.com github.com/xpressabhi linkedin.com/in/akm85

Immediately available; open to in-office, hybrid, or remote roles from Hyderabad

SUMMARY

Staff Software Engineer with 16+ years across AI agent platforms, frontend, and backend. Founded ServiceNow's Agentic Developer Platform, led a 9-person team, and ships agent systems end-to-end: tool orchestration, eval-gated rollout, governance, and full-stack React/Java ownership.

SELECTED AI WORK

Agentic Developer Platform (ADP) `ServiceNow · Creator` — −90% case resolution time · 20+ teams · 20+ skills and agents

MCP-driven engineering workflows `ServiceNow · 20+ teams` — −95% research and debugging · 20+ teams · higher accuracy

Build Agent, ServiceNow Studio `ServiceNow · App Engine` — 35+ metadata types · 11 domains · multi-model · self-healing

Release lifecycle & app summary agents `ServiceNow · Now Assist for Creator` — hours → one click · CAB-ready manifests · delta analysis

SKILLS

AI & AGENTIC ENGINEERING

AI agents, Agent UIs, MCP workflows, Claude Code, LLM APIs (Anthropic, OpenAI, Gemini), LangChain / LangGraph, Prompt engineering, Tool orchestration, Multi-model systems, Multi-agent orchestration, REAct agents, LLM evals (golden sets, LLM-as-judge), Agent evaluation & guardrails, Human-in-the-loop agent design (plan → approve → execute → verify), AI governance (AI Agent Studio / Control Tower), RAG / keyword retrieval (BM25, FTS5)

FRONTEND & PLATFORM

JavaScript (ES6+), TypeScript, React, Next.js, Redux Toolkit, RTK Query, Node.js, Webpack, Vite, PWA

BACKEND & ARCHITECTURE

Python, FastAPI, SQLite, Java, REST APIs, MongoDB, System design, Scalable frontend architecture, Design patterns, Developer productivity, Metadata-driven development

QUALITY, OBSERVABILITY & OPS

Jest, React Testing Library, Playwright, Performance optimization, Performance profiling & tuning (production regressions, budgets), WCAG / ARIA accessibility, GitHub Actions, Jenkins, Docker, Sentry, LogRocket, Datadog, Sumo Logic, Agent observability (reasoning traces, tool-selection errors, cost/latency), On-call & incident command

WORK EXPERIENCE

Staff Software Engineer · ServiceNow, Hyderabad

`Oct 2023 – Aug 2026`

AI Agents, MCP, Python, TypeScript, React, Node.js, Java

- Designed ALA's agent architecture (tool contracts, delta-analysis flow); owned requirements → EA Mar 2026 → GA Apr 2026.
- Set the App Summary consolidation architecture: Now Assist skills → AI Agent Studio; one generic flow replaces 4-provider settings (Now LLM, Gemini, OpenAI, Anthropic).
- Drove ADP adoption: legacy test coverage <20% → 95% in 4 weeks across update sets, source control, and team dev; 7 pilot squads.
- Stabilized Table Builder and Workspace Builder; grew Table Builder entry points 1→4, owned Studio support, UI/API fixes, and frontend performance.
- Instrumented agent quality in production — reasoning traces, tool-selection/hallucination tracking, cost/latency dashboards feeding evals — and shipped human-gated plan → approve → execute → verify with rollback.
- Tech-lead 9 engineers: ~60% hands-on coding, PR/architecture reviews, mentoring, cross-team coordination; Java/Glide full-stack ownership.

Senior Software Engineer · **Rippling, Bengaluru** Oct 2022 – Aug 2023
JavaScript, React, TypeScript, Node.js, Python, Playwright, Sentry, LogRocket

— Contributed to frontend infrastructure and global engineering initiatives; drove codebase improvements, interviewed candidates, and mentored junior engineers.

Lead Engineer · **Reputation, Hyderabad** Sep 2020 – Sep 2022
JavaScript, Node.js, React, Python, RTK Query, Sumo Logic

— Led the Actions Team frontend, migrating Angular → React and cutting page load time in half.
— Delivered the Actions feature and management dashboard; raised accessibility compliance from 80% → 95%.

Co-Founder / Lead Developer · **Worktech Software, Hyderabad** Jul 2017 – Aug 2020
JavaScript, Node.js, MongoDB, Meteor, REST APIs

— Built products and services with JavaScript, Node.js, MongoDB, Meteor, and REST APIs.
— flexzone.in (2018–2020): café aggregator for coworking spaces; hospeto.in (2017–2018): doctor video consultations with records and billing.

Senior Developer · **Eze Software Group, Hyderabad** Jun 2016 – Jun 2017
REST APIs, MS SQL

— Built an order-management system for real-time short-selling, plus EzeLocate and DataFeed for short inventory and real-time stock data (REST APIs, MS SQL).

Project Leader · **Oracle, Hyderabad** Jun 2010 – May 2016
Java, Oracle Database, Oracle ODI, SQL/PLSQL

— Built Plan Copy and Benefits Relationships systems (Java, Oracle Database, SQL/PLSQL); cut HRMS test-to-production data setup by 80%.

PROJECTS

SpendIQ Copilot — LangGraph ReAct over SQLite/FTS5 with SELECT-only SQL guardrails and a 14-case golden-set eval (majority voting).

ordo — On-device Qwen2-VL-2B on iPhone via llama.cpp; TTFT 30s → 805ms through architecture and resolution.

Revision — Local-first Tauri + FSRS-5 interview prep; fully offline from a single SQLite file.

EDUCATION

National Institute of Technology (NIT), Tiruchirappalli — Master of Computer Applications (MCA) · 2007-2010

Banaras Hindu University (BHU), Varanasi — BSc (Hons), Mathematics · 2003-2006

Abhishek Kumar Maurya · Hyderabad, India
