Abhishek Kumar Maurya

Staff Software Engineer building AI agents, MCP workflows, and scalable software platforms

Hyderabad, India +917842740174 akm.nitt@gmail.com github.com/xpressabhi linkedin.com/in/akm85

SUMMARY

Software engineer with 16+ years of experience building AI agents, MCP-driven workflows, and scalable developer platforms. Founded ServiceNow's Agentic Developer Platform (adopted by 20+ teams), leads a 9-person engineering team, and has deep roots in frontend architecture, system design, developer productivity, and enterprise reliability.

SKILLS

ARCHITECTURE
System design, Scalable frontend architecture, Design patterns, Developer productivity, Metadata-driven development

AI & AGENTIC ENGINEERING
AI agents, MCP workflows, Claude Code, Harness, LLM APIs (Anthropic, OpenAI, Gemini), Amazon Bedrock, LangChain / LangGraph, Prompt engineering, Agent workflows, Tool orchestration, Multi-model systems, REAct agents, Planning pattern (think first, then execute), Multi-agent orchestration, Local LLM inference (Ollama, MLX), On-device inference (iOS/Metal), llama.cpp / GGUF, Model quantization (GGUF ladders, imatrix), Vision-language models, LoRA fine-tuning (MLX), LLM evals (golden sets, LLM-as-judge, majority voting), RAG / keyword retrieval (BM25, FTS5)

FRONTEND & PLATFORM
JavaScript (ES6+), TypeScript, React, Next.js, Redux Toolkit, RTK Query, Node.js, Webpack, Vite, PWA

RELIABILITY & QUALITY
Jest, React Testing Library, Playwright, Performance optimization, WCAG / ARIA accessibility

BACKEND & DATA
Python, FastAPI, SQLite, Java, REST APIs, MongoDB, Meteor, Oracle Database, Oracle ODI, SQL / PLSQL

CI/CD & TOOLING
GitHub Actions, Jenkins, Docker

OBSERVABILITY
Sentry, LogRocket, Datadog, Sumo Logic

WORK EXPERIENCE

Staff Software Engineer · ServiceNow, Hyderabad

Oct 2023 – Present

AI Agents, MCP, Harness, JavaScript, Java, React, Node.js, Python

- Designed and integrated MCP-driven agentic workflows into the engineering lifecycle, adopted by 20+ teams; reduced research and debugging effort by approximately 95% while improving accuracy.
- Contributed to Build Agent in ServiceNow Studio, elevating App Engine with agentic workflows for AI-assisted application creation, flow generation, and tool orchestration across 35+ metadata types and 11 domains; built on the planning pattern (think first, then execute) and led its metadata-aware, multi-model (Claude Opus 4.6 default; Now LLM + Claude on Bedrock), self-healing agentic architecture.
- Founded the Agentic Developer Platform (ADP), a multi-team bootstrap and governance infrastructure for Claude Code, MCP servers, agents, and skills; built in 4 weeks on a multi-agent orchestration pattern and rolled out to 7 pilot squads with 20+ skills, 20+ agents, and 20+ teams.
- ADP outcomes: reduced case task resolution time by 90%, cut automation development from days to hours even on legacy codebases, lifted legacy test coverage from 20% to 90%, and reduced external defects by 90%.
- Led the ALA Release Lifecycle Documentation Agent and App Summary Agent (Now Assist for Creator): automated delta analysis, human-readable release notes, and CAB-ready deployment manifests on the REAct agentic framework — documentation time from hours to a single click; ships as the Release lifecycle documentation agent in Now Assist for Creator.
- Architected scalable React/TypeScript systems powering low-code tools including Table Builder and Workspace Builder; API and template contributions to the App Template Framework (ATFr).
- Lead a 9-person engineering team as tech lead: mentoring, technical hiring, and high-bar architectural reviews; ran cross-team onboarding sessions enabling teams to set up ADP skills, agents, rules, and MCP servers in a single session.
- Drive performance optimization and WCAG/ARIA accessibility compliance; established enterprise testing strategy with Jest, React Testing Library, and Playwright.

Senior Software Engineer · Rippling, Bengaluru

Oct 2022 – Aug 2023

JavaScript, React, TypeScript, Node.js, Python, Playwright, Sentry, LogRocket

- Contributed to frontend infrastructure and global engineering initiatives; identified codebase problem areas, drove improvement proposals, interviewed candidates, and mentored junior engineers.

Lead Engineer · Reputation, Hyderabad

Sep 2020 – Sep 2022

JavaScript, Node.js, React, Python, RTK Query, Sumo Logic

— Led the Actions Team frontend, migrating the application from Angular to React and cutting page load time in half.
— Delivered the Actions feature and management dashboard; raised accessibility compliance from 80% to 95% for a broad user base.
— Built maintainable, scalable, and testable features; mentored junior developers and reviewed code.

Co-Founder / Lead Developer · Worktech Software, Hyderabad

Jul 2017 – Aug 2020

JavaScript, Node.js, MongoDB, Meteor, REST APIs

— Built products and services using JavaScript, Node.js, MongoDB, Meteor, and REST APIs.
— flexzone.in (2018–2020): aggregator of cafés into coworking spaces.
— hospeto.in (2017–2018): video consultation platform for doctors, with health record and billing management.

Senior Developer · Eze Software Group, Hyderabad

Jun 2016 – Jun 2017

REST APIs, MS SQL

— Developed and improved an order-management system for real-time trading related to short selling.
— Maintained EzeLocate and DataFeed for locating short inventory and real-time stock-data processing.

Project Leader · Oracle, Hyderabad

Jun 2010 – May 2016

Java, Oracle Database, Oracle ODI, SQL/PLSQL

— Developed and improved Plan Copy and Benefits Relationships systems using Java, Oracle Database, Oracle ODI, and SQL/PLSQL.
— Completed the Benefit Plan Copy project, reducing test-to-production HRMS data setup time by 80%.

PROJECTS

SpendIQ Copilot `(live)` — Conversational spend-analysis agent: LangGraph ReAct over SQLite + FTS5 with SQL guardrails (SELECT-only, read-only connections), an AST-whitelisted calculator instead of eval, and a 14-case golden-set eval harness with majority voting — all passing

ordo `(live)` — Ordo take-home: on-device vision-language model — Qwen2-VL-2B on llama.cpp across a GGUF quantization ladder, deployed to iPhone (A16), with a private photo eval set, per-stage TTFT decomposition, and LoRA accuracy recovery

selftest.in `(live)` — Self-testing and government job preparation app powered by the Gemini API

lifetimetax.vercel.app `(live)` — Lifetime tax liability calculator

airoadtripplanner.vercel.app `(live)` — AI-powered road trip planner

faang-cv.vercel.app `(live)` — CV builder tuned for FAANG-style applications

EDUCATION

National Institute of Technology (NIT), Tiruchirappalli — Master of Computer Applications (MCA) · 2007–2010

Banaras Hindu University (BHU), Varanasi — BSc (Hons), Mathematics · 2003–2006

PATENT

US20150046358 — "Importing tested objects into benefits programs deployed on production systems" · assigned to Oracle Corp. · status: Abandoned
